

Submitter: J Carriveau  
On Behalf Of: GOOD BILL  
Committee: Senate Committee On Education  
Measure, Appointment or Topic: SB544

As smoking in schools is illegal, as is access to vaping equipment if under 21 years of age, it only makes sense, due to the general poor discipline in public schools that we should install vaping/smoke detectors in ALL rooms, Recommend you amend this to include All schools not just those of >1000 students, as that would only include 10-15 schools in Oregon. Cost is generally around \$300 each, which considering how money is spent in this state, is not a drop in the bucket for the education department to spend. Also recommend taking the vape equipment away from child AND a 3 day suspension as penalty, since a "virtual" slap on the hand will do nothing.

From medical perspective, we need to protect them as long as we can from the recklessness of smoking
