

Submitter: Aidan Larcombe
On Behalf Of: Rogue Climate
Committee: Senate Committee On Energy and Environment
Measure, Appointment or Topic: SB1187

Hello, my name is Aidan, I live in Central Point, Oregon, and I am a volunteer for a local environmental lobbying organisation known as Rogue Climate.

We spent the last 2 years lobbying for a clean air and electrification policy in the city of Ashland, and it finally got passed.

I see parallels of that policy with this one, so I am testifying in strong support, and I urge a vote YES for this policy.

Corporations are the biggest emitters, much more than individual people, and a lot of the time they are the least accountable.

Making them pay for firefighting, and other important measures means we can really get somewhere as a state to mitigate climate change.

Thank you

-Aidan Larcombe.
