

Submitter: John Harnden

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB1102

Aggressive environmental policies like senate bill 1102 can increase costs for residents and businesses, particularly if utilities face penalties for not meeting stringent standards. We are already paying 40 % more for utilities now compared to last year or the year before. Where do you want us to get our money from? The average Oregonian cannot make enough money to provide a standard home, A standard vehicle with the insurances and utilities that have risen astronomically over the last couple years just to sustain a living of purely waking up, working and going home to do it all over again the following day. Kotek and her ilk are literally not living in a commoners life. They're living in a glass house and pushing Oregonians out of the state. I suppose if your goal is to push all tax paying Oregonians out of the state and just allow the homeless population to take over so you can get your emergency funding to line your pockets. Good job.
