Economic Development, Small Business and Trade, Chair
Ways and Means Transportation & Economic
Development Subcommittee
Joint Information Management & Technology

OREGON HOUSE OF REPRESENTATIVES

April 4, 2025

I am writing in support of Senate Bill 1090.

We are entering a new era of technology that is rapidly transforming our world. Oregon is in dire need of updating its technological infrastructure, which is quickly becoming obsolete. Having outdated systems is not only bad for State records, data storage, and access to services; it poses security risks for Oregonians' private information. Additionally, having older systems results in inefficient and slow service delivery.

SB 1090 would help bring Oregon's technological infrastructure up to code, ensuring the government can continue to provide services efficiently and effectively while making sure Oregonians' data remains private. The Modernization Fund would provide agencies with the necessary resources to modernize their technological infrastructure in a manner that aligns with their mission and addresses the needs of their legacy systems. I am also supportive of the provision that establishes an advisory board, ensuring robust oversight of allocated funds.

SB 1090 is a critical first step toward good governance in the digital age. In conjunction with other proposals, such as my E-Oregon Task Force ([House Bill 3931](#)) and Permanent AI Commission ([House Bill 3592](#)), Oregon has a real shot to be a leader in delivering top-notch technology services for Oregonians.

Sincerely,

Daniel Loc Nguyễn
State Representative
