It's our land despite the fact we pay rent to the state, in the form of taxes, for life. We pay to locate the water. We pay to drill, more than once if no water is found. We install the well, build the shed and heat in the winter. In our area it's about \$30,000. We maintain it. When the power goes out we have no water or provide temp power. When the pump dies we spend \$7500 to replace it. The state has no right to pile on top of this already expensive and vital part of our housing costs. I strongly oppose this government over reach.
