

Submitter: Lisa Adatto
On Behalf Of:
Committee: Joint Committee On Ways and Means
Measure, Appointment or Topic: HB5006

Dear Members of Oregon Ways and Means:

I strongly support SB 1536. This bill funds a central information service that allows Oregonians to find out about subsidies and tax credits to use for energy efficiency, renewable energy and electric appliances. This is a critical component of our work to meet Oregon's climate goals, to allow citizens to save money on energy, and to create clean and safe energy sources.

This effort is highly leveraged. In other words, a small investment from the state will unlock and help facilitate efforts by hundreds of volunteers, operating throughout Oregon, to provide necessary information to Oregon residents. It is rare for a state investment to make such a difference.

We know that money is tight, and we want our state resources to be used effectively. Please fund SB 1536, so that volunteers and citizens around the state can gain access to the information they need to improve our environment and invest in clean and safe homes.

Sincerely,

Lisa Adatto, Lake Oswego Oregon
