

Submitter: Rebekah Courpet
On Behalf Of: St.Johns
Committee: Joint Committee On Transportation
Measure, Appointment or Topic: HB2749

As a long time resident of St.Johns, I have long been concerned about the state of our bridges and the impact a major earthquake would have. My family would be completely separated as my daughter attends a school further inland and I work in NorthEast while my husband works from home in St.Johns. Without the bridge being fixed, getting resources into St.Johns after a major incident would be near impossible and completely unsafe. Please hear our plea to maintain/improve at least one of the bridges we rely on daily!
