Measure, Appointment or Topic: HB5006

Please provide additional support to students with IEP's and 504's. I have had a handful of students who require one-to-one support in the classroom and don't have it available. I try my best to help, but often am unable to support one person for more than a few minutes at a time with 30 students in a class. It is not fair to integrate students with high needs into a class and not provide them with additional support. Thank you for your consideration.
