

Submitter: Gisella Longbotham

On Behalf Of:

Committee: Joint Committee On Ways and Means

Measure, Appointment or Topic: HB5006

I am a teacher and I have a daughter at a public school. As an educator, I have enjoyed teaching at my school and support my students to be successful in their learning. Having so many students in classroom will impact tremendously in their education. I always try my best in giving students the best of me and providing them with one on one feedback when necessary. Having too many students in a classroom will impact my ability to support them as it will be very challenging to do so. I wish law makers ro not cut federal funds and to support students in need so they can be care for at school and be given the resources they would need in order to be successful at school. Maintaining a small class size will also be important so we, educators, can support all our students and provide the best educational environment possible for them.
