Measure, Appointment or Topic: HB5006

Teachers are being asked to do more every year with fewer resources. Adequate Special Education money is extremely vital for our schools. Every student deserves a quality education and I can not give that to them when I have over 30 students in every class at middle school and no help with our special education students. We need more teachers and we need more aids. Eliminate the 11% cap and increase the high-cost disability grants.
