

Submitter: Jennifer Abercrombie  
On Behalf Of: All Oregon tax payers  
Committee: House Committee On Revenue  
Measure, Appointment or Topic: HB3940

To whom it may concern,

Read my lips- no new taxes! We are already being heavily taxed for the purpose of caring for the BLM lands. What are you doing with all of that money? It's definitely not going to cleaning up the forests!

When there was proper forest management the fires were of normal natural size and a healthy occurrence each year. What's happening now that forest management and fire season is its own economy in this state? It's definitely not burning natural and now mega fires are occurring everywhere. Change the management practices back to when they were successful, it's that simple!

We citizens have nothing left over to give to anything else. Please stop taxing us to death and not having any progress to show for it. Vote No on 3286, tax increases is not the answer! You're short on money because of the lack of Federal funding being given due to the decision to not obey the Federal Laws. Nobody wants you to fund entitlement programs instead of using the funds for forestry management. Use the money you're already receiving. Just like we are forced to budget, so should you. Many of the state's problems would work themselves out if the budgets were run properly.

Thanks for your time and listening to my concerns and reasons to oppose 3286,

Jennifer Abercrombie
