

Submitter: Jocelyn Bohnet

On Behalf Of:

Committee: Senate Committee On Health Care

Measure, Appointment or Topic: HB3824

Physical therapists should be allowed to perform dry needling because we possess extensive training in anatomy, neurophysiology, and musculoskeletal function, which equips us to safely and effectively use this technique to relieve pain, improve mobility, and accelerate rehabilitation. As licensed healthcare providers, physical therapists are well-qualified to integrate dry needling into evidence-based treatment plans tailored to individual patient needs.
