

Submitter: Robert Sowdon
On Behalf Of: HOAX
Committee: Senate Committee On Education
Measure, Appointment or Topic: HB3365
Chair and Committee Members,

What is Climate Change? The climate has always changed from the beginning. Al Gore was wrong, Carbon is not the problem, Earth is carbon-based, we humans are carbon-based, Co2 is life itself as plants use Co2 to create Oxygen, which we humans need to breathe. Let the children learn the three R's, quit feeding them propaganda. Good forest management is key to a healthy life!
