

Submitter: Michael Arnot

On Behalf Of:

Committee: Senate Committee On Health Care

Measure, Appointment or Topic: HB3824

The proposed bill 3824 should be opposed due to scope of practice expansion of the PT's and their assistants PTA's to allow venipuncture, spinal and extraspinal manipulation, and administration of vaccines. The education background is not in place for them to perform these skilled services and poses a danger on the general public if they were allowed to do so. Additionally they are attempting to limit the use of descriptors surrounding "physiotherapy" and "physical therapy". The Oregon Chiropractic and Acupuncture associations strongly oppose this bill. Please vote no. Thank you.
