

Submitter: Nicole-Marie Westbrook
On Behalf Of: Natural Life Chiropractic
Committee: Senate Committee On Health Care
Measure, Appointment or Topic: HB3824

This is an absolute disgrace. Chiropractors are physicians too. With a thorough education and evidence based care that is not only safe but effective. We have countless patients who made zero progress with physical therapists. They waited for months to get seen only to be failed by minimalist care.

Chiropractors already have to lengthy calls and submissions to have the right to care from insurance companies. This measure threatens the ability to practice for all Oregon chiropractors and will cause harm to our thriving patients. This should not be passed and measures to support the successful treatments rendered by Chiropractors should be implemented instead.
