

Submitter: Tiffany Altilio

On Behalf Of:

Committee: Senate Committee On Health Care

Measure, Appointment or Topic: HB3824

I strongly believe it is in the public best interest and safety that this measure is not passed. I believe we frequently underestimate the skill and precision required for the safe deliverance of a chiropractic adjustment and vaccination. I have been extensively trained in both because I am both a chiropractor and a retired RN. I also have been actively involved in training for nursing assistance and chiropractic assistance, similar to PT assistants, and know without the background education in physiology they absolutely should not be performing an expanded scope.
