

Submitter: Martin Stewart  
On Behalf Of:  
Committee: Senate Committee On Rules  
Measure, Appointment or Topic: SB243

As a Mayflower and Jones town descendant with grand parents who wrote the constitution including many who gave their lives for our rights and freedoms I feel the obligation to call this as I see it, We obviously have some board members who have stated they are afraid of someone being so angered that they fear being shot, This tells me that these paranoid individuals must have North Korea in mind for America, It's so obvious that these people are enemies of the state, All the do is attack America they must not understand America period! The very people they are attacking are most likely the ones that would defend them from those with evil intentions. The fear mongering and hate being sold to Americans is off the charts insane, I've lived in Oregon my entire life and as I recall before mail in voting we were a red state? It's quit apparent you have all sold us down the proverbial toilet to America haters such as George Soros, Hollywood is pure propaganda, The billions stolen from tax payers will have reparations,Defending criminals and terrorizing law bidding citizens only says one thing...

My ancestors also wrote the Magna Carta of which or constitution is based on, The middle class has only been around about 150 or so years, before that it was tyranny and that is now the agenda of the insanely paranoid liberal party...We don't pay you to attack America, Do your job and balance the budget and all the things you're being paid to do and if you live a moral and riotous life are you can stop living in fear.... Destroying America is a FELONY!

Martin Stewart 1845 Oregonian.
