

Submitter: Carol Yarbrough

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: HB3336

Chair Sollman and Members of the Committee,

HB 3336 (Grid Enhancing Technologies) is a commonsense solution that will expand transmission capacity by requiring utilities to deploy cost-effective technologies to existing infrastructure.

Oregonians need expanded capacity to help reliably and affordably deliver clean energy.

Thank you!
