House Committee On Rules

Measure, Appointment or Topic:

HB3971

Legislative persons. I respect and appreciate your time in reading my objection. I am against placing a mixed use waste processing station anywhere in the county that has the potential to expose noxious substances and potentially hazardous substances to the air or water. Our county is already inundated with toxic waste from the homeless camps and other irresponsible people and practices. I don't think that we currently use facilities designed to take specific waste products. I believe that this is due to excessive regulation and fees. I think it would be a better use of resources streamline current regulations and fees before we jump into placing a facility in an area that is prone to flooding and potentially causing our water supply and waterways to become contaminated.

Sincerely

Julie Erlei
