

Submitter: Ryan Swofford

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

This package must FULLY fund public transit in this state. It must provide the framework for safe streets and walkable communities. It must stop contributing anymore money to freeway expansions that increase emissions and seep carcinogens into the air we breathe. We must stop appealing to the car and freight lobby and put the needs of our people first and provide options for transportation, not just wider freeways. Frequent and reliable public transportation is freedom and we owe to all Oregonians to provide it.
