Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

This is a horrible bill. We should not be throwing more money to an institution that's needs to be audited and figure out where all the money we already give them goes. As an Oregonian I've had to tighten my belt due to lower income so should this agency. They need to perform their core services and not take on large projects as they have demonstrated time and time again they do not know how to plan or manage projects without huge over costs. Until they figure out how to plan a project and execute it with the huge overruns they should get no funds. All of these taxes are horrible and we do not need the. I urge you to vote against this outrageous bill.
