

Submitter: Jojo Merritt

On Behalf Of:

Committee: Joint Committee On Transportation Reinvestment

Measure, Appointment or Topic: HB2025

As a person without a driver's license, public transportation is important to me, but I also know about the impact it has on the rest of the community. It has a lower impact on the environment due to more people being transported in a smaller space, and also can incentivize going places you've never seen before! I want to be able to see our public transportation be able to help even more people than it already does!
