

Submitter: Sarah Medley

On Behalf Of:

Committee: Senate Committee On Rules

Measure, Appointment or Topic: HB2977

I strongly support this bill. Protecting Oregon's native wildlife, restoring habitats, reducing wildlife-vehicle collisions, and supporting efforts to help people and wildlife coexist is essential. With the effects of climate change becoming more serious, we need to invest in our home and this bill would do that. Keeping Oregon's native wildlife is important for combating the negative consequences of climate change and helping people endure the inevitable changes.

Oregon is a beautiful, unique place and deserves to be protected. From the trees to the coastline and the Alvord Desert, there is nowhere like this incredible state. Please do the best thing for your home and yourself and support this bill.
