Legislators:

Reform ODOT instead of raising taxes effectively 32 cents per gallon. That is the equivalency from LRO's revenue statement posted this morning.

Oregon's fuel at the pump for the average person is over \$4 for gas and \$5 for diesel. Oregonians average \$6200 in credit card debt paying over 20% interest just to afford food and commuting costs today. Inflation is really 20-25% not the BLS and political lies from DC and Salem ... simply look at HB 3991 itself to debunk the 2% lie. Or SEIU raising. Or you regular session budget increases.

Do not believe me? Then ask a millennial or younger why they think self-serving boomers and silents in government, corporations, and the donor class have placed them in indentured servitude. So what do millennials and younger believe?

ODOT and ODOJ require massive reforms. SEIU during the transportation 'road show' pointed to massive ODOT management issues. Millennials and younger call this fraud, waste, abuse, and corruption. Joint Transportation failed because Ways & Means failed to support reform, instead, participating in the fraud, corruption, and waste using tax dollars. Counties, cities and districts are just as guilty. 80% of voters oppose new taxes. Millennials see ODOT building \$80,000 corners, \$250,000 crosswalks, and ADA access to nowhere daily. They see the woke government in Salem and DC for what it is ... masters of indentured servitude.

Self-serving DC politicians, bureaucrats, corporate lobbyists, and donors are seen as slave masters by young Americans now. Eighty-two U.S. Senators want 500% tariffs placed on China and India which will destroy Oregon's economy. DC wants a hot oil war in Russia, Ukraine, Iran, and Venezuela which will easily double pump prices. The young will see the tax sticker on their Oregon gas pump then blame the legislature not DC profiteers. Nor can we expect them to volunteer to

fight a corporate government war to donor profits ... social media will prevail over your legislative censureship.

Across the Global South, millennials are replacing corrupt governments who were backed by the dying western empires in Europe and North America. USG is top of the list as the enemy of millennials worldwide. Democrat and Republican alike. Millennials topple those government by force not by voting. They are holding present and former politicians, like us, like me, accountable. None of us are safe. DC politicians and generals changed federal laws in the 1970s on not using the military domestically not to 'preserve democracy' but to ensure young soldiers did not turn their rifles on the self-serving politicians and general along with their bureaucratic and corporate supporting. Ask a Vietnam veteran what "fragging" means. US debt is bad enough but the UK, France and German governments are in financial collapse this week as well. All buried in worthless debt. All want a USG bailout via the IMF. Why? The skyrocketing price of oil and energy caused by self-serving politicians and their profiteering supporters.

The Millennial Revolution will happen in Oregon and the United States if we do not reform immediately. It may happen anyway as indentured servants cannot be kept indentured forever. You do not have enough police to suppress the millennials and young anymore. We past and present politicians, bureaucrats and corporate profitters have all created the present anarchist nihilistic society. Now we will face the disastrous consequences. And not at the ballot box. What is happening in the Global South will happen in Salem, Portland, DC and even every rural community. It looks like the 1930s all over again ... WWII?

The Governors typical uniparty 'fear tactic' of sending out pink slips to union members while threatening to close roads to the public is simply election politicians. If the Legislature can pay for baseball stadiums then it can pay to keep union employees at ODOT ... fire the management. An ADA reboot alone would cover the shortfalls for several years, if the shortfalls are even real. Your climate change, woke and diversity waste would easily pay to keep rank and file ODOT employees. Revolution will kill us faster than the climate. And not in 10 years. The legislature created this problem thus needs to step up to the required reforms before millennials end the great experiment called the USA.

If raising taxes is your answer, then all of the present, and past, politicians, including me, will face the dire consequences when the millennials topple the government. It will make the French and Russian Revolutions look like a picnic. Do not believe me? Simply look at the millennial soldier's killing fields in Ukraine, Russia, Gaza, Lebanon, Yemen, Syria, Libya, and shortly Venezuela. All this killing is fully supported by the uniparty in Washington DC along with most of Oregon's congressional delegation. Not to mention Sudan, Congo, Burma, etc. History proves it can and will happen here ... millennials will do it!

Reform ODOT and ODOJ not raise taxes by billions per LRO's statement.

Respectfully submitted,

Brian Boquist
