| Measure, Appointment or<br>Topic: | HB3991   |

To all concerned government officials:

I employ you to say no to this bill. It will harm every Oregonian. It will further harm small business. There is no "tax the rich" on this bill. It hurts families. I understand you have jobs to save, and ODOT to fund. But this is not the way. You have other options and you know that! You don't want to be responsible for causing our beautiful state to have the highest gas in the country. Doing so- will prevent tourism. No one will want to pay those gas prices, so why bother coming here? We have already told you NO! so why are you trying to do this when you think no one is looking? I will tell you- we are watching. We are paying attention. We are tired of telling you no! You need to heed your constituents, because I guarantee you- we will not forget. You have reached your limit of ignoring your people. We are done. If you vote yes and pass this- expect to no longer have a job come next election.
