

Submitter: David Wall  
On Behalf Of: Mr Oregon OPPOSES SB 430  
Committee: Senate Committee On Labor and Business  
Measure, Appointment or Topic: SB430

I OPPOSE [SB 430] as written.

Whereas I support full transparency of all business transactions upfront fees and complete charges for services and goods, I have some concerns.

On the purchase of goods, some Internet sales fail to identify the country of origin where the specific goods are made. Personally, I do not support buying goods (and or services) from adversaries to the U.S.A..

[SB 430] fails to report on the Federal Laws protecting consumers such as, Federal Trade Commission and Consumers Sales Protection Act. There are many others.

The necessity for consistency in law to address various jurisdictions becomes a significant issue usually resolved by the Uniform Commercial Code.

[SB 430] although well intended, will disrupt the "consistency framework" causing the business communities to adapt and this "adaptation" will come at a price-usually higher prices for goods and services and thus adding to higher inflationary pressures.

[SB 430] should be rejected in current form and possibly be amended for future considerations.

David S. Wall

Mr. Oregon Concurr and says, "Less regulations are business friendly, Consumer protections YES! More needless regulations NO!"
