Labor and Business Committee

Dear Chairman Taylor and members:

SB 916 is a glaring example of how little our super-majority understands about both human nature and economics. Squeezing already overtaxed business people to pay for unemployment of workers who have walked off the job only incentivizes strikes. This should not be an obligation of people who can barely pay their expenses now due to the self-indulgence of our legislature.

Oregonians are already going to feel the withdrawal of Federal funding because you insist on remaining a Sanctuary state for criminal aliens. I don't want to dig deeper into my pockets to pay for people not to work. Vote no on SB 916.

Expecting common sense,
Lyneil Vandermolen
