

RE: Support for SB 916

To the Senate Committee On Labor and Business,

A huge factor to people choosing to vote no on a strike is their ability to provide for their families. A significant amount of nurses are women and maybe even single mothers. That group of coworkers impacts us and our power to vote and to stand by our patients and demand better working conditions from our employers.

It's time to remove profit from healthcare and do what's right for the people.

Thank you for accepting my testimony and I look forward to your support.
