RE: Support for SB 916

To the Senate Committee On Labor and Business,

The rights of workers to collectively bargain for improved quality of life and improved quality of care are sovereign, and they must be able to do so without putting their and their family's security at risk. Untold thousands of Americans have chosen to fight for their basic rights at the expense of their financial stability, and we must honor their bravery and sacrifice. It is crucial to empower labor and put the wellbeing of healthcare workers (and ALL WORKERS) over corporate profits. All solidarity with striking Providence workers, all power to labor, down with corporate profiteering.

Thank you for accepting my testimony and I look forward to your support.
Allison Menzimer
