RE: Support for SB 916

To the Senate Committee On Labor and Business,

I agree that there should be unemployment during a strike. It has been very difficult to survive for a whole month without any income. I am the main provider for my family and not having income has really put us at risk for losing our home, vehicles and causing bills to become delinquent. You'd think people would give you grace in this situation, however they don't care. I can only pay some of my rent and since all of it wasn't paid, I now have a \$100 fee I now have to pay. It's really hard to fight for what's right if you can't access all resources and having unemployment would be a great resource to have.

Thank you for accepting my testimony and I look forward to your support.
Angela Schultz RN
