

Submitter: James Mullen

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3075

This testimony is in opposition to HB 3075. The proposed legislation produces no meaningful impact on gun violence, it only seeks to eliminate the rights of dutiful and lawful Oregonians. The need for reform to any laws impacting Oregonian Constitutional rights are better served through thoughtful and well planned measures. You seek to disenfranchise the very people you represent, and in doing so criminalize a great portion of your constituents. The clause included to only allow challenges to this law in a single court in a single county is tantamount to defrauding any law-abiding Oregonian of their rights to due process and follows in the footsteps of the Trump Administrations attempts to limit the checks and balances necessary to a lawful community. Your chosen avenue of providing permits via Police approval through a yet undetermined and established system, limits the inherent rights of minority and underserved portions of the population. This at a time when your constituents are afraid to walk down the streets of the city I reside in. You seek to limit their ability to protect themselves from the drug addled transients you shoved into our society with Measure 110. Please refrain from voting in favor of yet another law which will cost the taxpayers money in court to fight the impending appeals, and yet another blow to the safety and security of the people you purport to serve.
