Opposition to Oregon House Bill 3075

Dear Members of the Oregon State Legislature,

I am writing to oppose Oregon House Bill 3075 due to several concerns:

1. **Unintended Consequences:** The bill may inadvertently harm the very individuals it aims to help, potentially worsening existing issues rather than alleviating them.
2. **Economic Impact:** The proposed measures could impose financial burdens on businesses and taxpayers, hindering economic recovery and growth.
3. **Regulatory Burden:** Increased bureaucracy could complicate compliance, stifling innovation and deterring new businesses.
4. **Lack of Comprehensive Solutions:** The bill addresses symptoms rather than root causes, and we need deeper, more effective solutions.
5. **Insufficient Public Engagement:** There has been a lack of input from affected stakeholders, which is crucial for informed decision-making.

I urge lawmakers to reconsider this bill and explore alternatives that better serve our community's needs.

Thank you,
