

Submitter: Fred Williams

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3075

Committee members,

This measure and any measure and any measure that's has been challenged in the courts should not be allowed to moved forward. In fact, any legislation, not just gun control that the people are questioning the Constitutional validity of should not move forward.

You never here about legislation that insures rights are not infringed being fought so hard.

This one is particularly heinous in that not only does it criminalize articles and activities that were previously legal in our state, but it also makes our laws different from other states where these articles and activities are perfectly fine. These states actually have less gun control, and less crime. Fewer criminals with access to firearms, more lawfully armed citizens, and fewer gun related deaths.

Stop trying to make it harder for law abiding citizens, and focus on the criminal elements. In fact, we should be making it easier for law abiding citizens to acquire firearms, have standard capacity magazines which do infact hold more than a few rounds, and reduce the restrictions in places where we can legally have a firearm for our own self defense.

Respectfully,

Fred Williams
