

Submitter: Damion Miller

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3075

As a citizen of Oregon that has a love for the outdoors and activities done in such place. As well as carrying a firearm for self defense for me and my family, that includes three small children. I strongly oppose this bill and feel suffocated by the erosion of my rights and those of my children. This bill makes it unnecessarily difficult to obtain and carry firearms already owned or for future purchase. I have lawfully owned and carried a firearm from the age of 21. This bill would instantly make me unable to carry my standard capacity magazines that are used in my everyday firearm. I have invested hard earned money made in this state, that is taxed to then turn around and rip my rights away from me. I then would have to spend even more money to purchase a limited firearm to comply with this bill. I love this state for its beauty and opportunity for adventure, but I feel like I am as well as many others getting stepped on by overreach of the local government. This bill like others that have restricted firearms have done nothing to show a reduction in crime. It is sad that this state is feeling less like home. Thank you for hearing my words and taking them in consideration.
