On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3075

114 is inherently unconstitutional. To say that no one is using high capacity magazines for self defense is absurd. The Hellcat, one of the most popular concealed carry handgun on the market, only has an 11 round magazine as its smallest option. Statistically magazine bans don't reduce crime rate. It never has. And requiring law abiding citizens, who are already passing background checks, to pass a background check to get a license to purchase a firearm, is insanity. This is stopping no one from acquiring firearms, other than law abiding citizens. If a criminal wants a firearm, they're gonna get a firearm. This entire measure has been ruled unconstitutional by the Supreme Court a number of times. This benefits no one other than criminals. The fewer people carrying firearms legally, statistically increases violent crime. Look at Detroit, Chicago, Los Angeles. Highest crime rates in the country, also the strictest gun laws. It is clear that you have no interest in public safety, just a disarmed populous. To ignore all the empirical data, and fear monger your bill in, is abhorrent. And then to try and make it only challengeable in Marion County, which you know will have give you a more favorable judge, is unbelievably corrupt. To say you're for the people's will is a joke. You couldn't care less about your constituents. This bill is an insult to the state, to its citizens, the constitution, and to the founding fathers.
