Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB3075

Measure 114 & HB3075 both do not do anything to thwart criminals from obtaining firearms and/or committing crimes with them. Criminals do not obey laws. These two bills only put more restrictions on legal firearm owners who are abiding by laws that are already in place. To obtain a firearm, there are already strict background check procedures in place. There is nothing set up for the permit to purchase & the police departments are already overburdened. As for the "high capacity magazine" aspect, many, many common handguns are designed around the magazine that are by design, more than 10 rounds. These laws will instantly turn many law abiding, safe firearm owners into criminals. These laws actually make it MORE dangerous for the general public. These laws directly go against the 2nd ammendment & if pushed through, will do nothing but create MORE crime and potentially drive the black market for firearms even harder, making being out in public MORE dangerous. I strongly oppose M114 and HB3075.
