Cecil Wesner

On Behalf Of:

Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB3075

While the government can require a license for certain activities, like driving a car, it cannot convert a fundamental right into a privilege and then charge a fee or require a license to exercise it. Criminals will not follow these laws that your making. All this is doing is making law abiding citizens criminals and defenseless. Chicago has a high number of gun deaths because they have the most gun laws that keep law abiding citizens from owning a firearm for protection. The class is not even available. Nor does any police or sheriff or state police have the man power to do it. This is a misappropriation of tax dollar resources. Burdening our already burdened law enforcement. So if this passes we will then have to wait for the class to be structured which can then take how long before this is ready for people to take. Which then becomes a violation of my 2 Amendment right. I am a law abiding citizen. But this measure goes through and I will leave this state and watch from afar how fast it circles the drain like Chicago has. Don't Comiefornia Oregon. Portland and Salem seem to be the places where gun violence is more prevalent by people with a major criminal background then other city's. Go after the criminals don't make criminals of law abiding citizens. That is all this house bill is going to do. Evidently, politicians don't understand that guns don't kill people bad people with guns do. That's like blaming forks for people getting fat.
