

Submitter: Noel Houck

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3075

I oppose any thing that takes away my 2 amendment rights . There are already enough laws to prevent criminals and underaged people from purchasing firearms arms . We need the courts to start doing their jobs . Start holding criminals accountable . Make it easier for law personal to do their jobs. We the need the courts to work for the people. Putting more laws on the books is not going to do anything when what's on the books is not being upheld which has caused the problem . If someone wants to kill they will . Whether it be with a knife , auto , posion crow bar the list goes on . Making tougher laws is NOT the answer . Upholding what is on the books is a first step in the right direction . And bringing back the respect for life . More laws will not solve anything . Where's the common sense ? NO MORE 114 will not help save lives . Go after all the you tube crap schooling people on how to make life ending at home projects .
