Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB3075

This measure takes away our ability to exercise our 2nd amendment right to bear arms when we aren't allowed to purchase a firearm without jumping through impossible hoops(education and training requirements are not available in all counties). Law enforcement doesn't have the staffing in every county to provide this education and hands on training to ALL Oregonians and the legislature didn't provide any additional funding for them to do so. This will create another backlog and delay law abiding citizens from purchasing a firearm to protect themselves. Criminals don't follow the current laws to purchase firearms and this measure punishes the law abiding citizens that will try and go through this process that is deeply flawed and not ready! I am disappointed that the Oregon court does not see that this is an infringement on our 2nd amendment right and hope this gets an appeal soon!
