So the “Party of Democracy” demands that only echo chamber supportive voices can be heard during the informational session for HB3075.

During the hearing for HB3075 the “Party of Democracy” does not allow the opposing party to ask questions that may cast light on errors in fact or logic on a bill that essentially strips or greatly limits Constitutionally guaranteed rights (Federal and State) from law-abiding Oregonians.

The “Party of Democracy” constructs the rights stripping bill as an “emergency” to make sure that there is a de facto ban on an actual direct, democratic action that could put the bill before Oregon voters in the form of a referendum. (after all if democracy is allowed the bill might be over-turned-THE HORROR)

I would write as to the myraid of errors in logic, reality, morality, etc that are the essence of this stripping of rights bill...but that would incorrectly assume that logic or fact would have any bearing at all on the “Party of Democracy’s” breakneck, blind barreling down the path to despotism.

George Orwell never actually met the current denizens of “Party of Democracy” but his writings indicate that he knew them well. After all, “tyrants gonna be tyrants”.
