

Submitter: Kanren Lee

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3075

As a conceal carry holder since the 90's I oppose the permit to purchase. I have undergone extensive training through BPSST and I haven't seen any provisions for people like myself in this bill. All I see in this bill it is just going to make legal gun owners felons. All the legislation in the world is not going to stop the criminal from doing bad things. Have you looked into the video games children and adults are playing. There are shoot first ask questions later games. This is what the younger generation is learning. Our younger generations have lost interpersonal communication skills and conflict resolution. Maybe if these were taught once again in schools people would use there words to resolve problems not guns. Again I oppose this bill. In no logical way will it reduce gun violence. It will just make law abiding citizens more vulnerable.
