

Submitter: Casey Haneberg

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3075

I oppose HB 3075, as I believe it infringes on our rights but, more importantly, it is a poorly thought out solution for a complex problem. I support gun control; however, an effective and successful implementation must include perspective and collaboration from both sides of the equation. It is disappointing to read these sadly written measures by individuals who are clearly not part of the gun community. It's obvious they have no interest in finding a solution that protects the rights of legal gun owners but, instead, tries to criminalize them. I have a family in Oregon, and their safety is my top concern. In a world where police are not legally required to risk their life to protect them, the people of the State must be equipped to do so. Please increase penalties for illegal gun possession, continue standard background checks for all purchases, and establish red flag laws to remove firearms from those in mental crisis or domestic violence situations.
