ANNE SANTA

On Behalf Of:

Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB3075

I am a child psychologist who worked on collecting signatures to get this on the ballot. I had a client whose brother shot himself because he was so upset he was behind in his schoolwork and wasn't allowed to make it up. if he did not have a such a lethal mode of ending his life in his distressed moments he would still be alive. Firearms should be carefully stored and used. Children and depressed people can too easily kill themselves or others. please pass H B 3075-1 out of committee without delay so it is read as soon as courts stay is lifted. We have lost too many lives while this has been litigated.
