

Submitter: Andrew Tan

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3075

This permit to purchase or own is identical to east coast gun control with racist or discriminatory origins whether it is North Carolina or one of the establishment liberal cities in the northeast, gun control more designed to make gun ownership as difficult as possible to kill any gun culture than actual safety. As someone from a northeast state with these permit to purchase policies, I am strongly opposed to this gun control measure. A often overlooked reason to why people have interest in this region of the country is that it historically neither emulated tyrannical natures whether it is southern states that are strict on bodily autonomy rights or mortheast states with draconian gun control designed to suppress civilian gun culture.
