

Submitter: Brian Derrickson
On Behalf Of: Self
Committee: House Committee On Judiciary
Measure, Appointment or Topic: HB3075

Hello, I'd like to submit testimony to an attack on freedom. Some may not see it that way because they hate firearms but the fact is if the government can step in and take a right away they can take any right away. I carry a firearm to protect people from bad people doing bad things. Myself I've never been afraid to die and would give my life to save people. Bills like this target the good people that follow laws, the people that would rush in to save others. Criminals have never followed the law. They steal, rape, get weapons and nothing stops them. Just like any law only the good people follow it. I ask why would we make laws against good people? Our police forces are over worked and under staffed the bottle neck at the administration level will essentially stop all firearm purchases. I'm sure that's your goal. Most of us could spout off stats about how safe legal gun owners are and how many lives are saved by legal gun owners but the facts are a firearm is a tool. A hammer builds a house a broom sweeps the floor they don't do it by themselves. Bad people doing bad things. I encourage everyone that supports these anti gun bills to educate themselves reach out to friends and family member's that may hunt or enjoy shooting and be open to changing their minds. Some day you could be in a life or death situation don't take away the tool a good guy could use to save you. Thank you.
