

Submitter: Jeff Kropf
On Behalf Of: common sense and logic
Committee: House Committee On Judiciary
Measure, Appointment or Topic: HB3075

As a former state legislator, long time gun owner, CHL holder, hunter and as a civilian embedded with ORNG Ranger units in Iraq and Afghanistan I strongly object to the provisions of HB3075 that codify the unconstitutional MZ114 in state law. It is an insult to every veteran, especially combat veterans and former or current law enforcement to have to comply with the provisions of HB3075, especially the training requirements to be issued a permit to purchase. Think about it... what is any training that they would have to endure under this new law teach them anything they don't already know or have experienced in real life. It makes no sense at all. Law abiding citizens are not the problem here, especially veterans or law enforcement but rather the criminals are the problem and the truth is that neither this bill or MZ114 will do nothing take guns out of the hands of bad people. This bill is meant to discourage and slow down the lawful process of owning and purchasing firearms which only hurts law abiding citizens like women and minorities from being able to defend their lives and their families from the criminals who don't care about this or any other firearm law. Again, common sense and logic demand that this bill be defeated and rejected by this committee and the legislature. I urge a no vote.
