

Submitter: Ritch Hanneman
On Behalf Of:
Committee: House Committee On Judiciary
Measure, Appointment or Topic: HB3075

Since when do we need permission to have a right. Now for the reasons My family Oppose this bill :

This violates the Oregon constitution and the United States constitution .

1. There is no provision in here to punish the criminals . Like Antifa , BLM , and other gangs and violent offenders. This only makes the public more of a victim.

And no provision to punish out of control politicians, lawyers etc. that promote violent criminals

2. With the increase in violent illegal aliens that have been allowed into this country this bill is insane.

3. The FBI will not do multiple back ground checks . They already advised that they won't .

4. This bill and any like it violate existing supreme court rulings. Examples Bruen and Heller cases.

5. the Firearms protection ACT 1986 .

6. The in common use laws.

7. Affirmative defense violation .

8. There are no statistics that support any part of this bill as to saving anything or anybody. The statistics only show an increase in violence and crime.

Unless that is what the bill wants to accomplish. Or is it just complete confiscation of all arms except for the criminals?

9. This bill is also racist and singles out citizens of lower income who can not afford the monies involved in this bill.

10. The dead line of 2022 is stupid.

11. Why does the State allow this kind of a bill to tie up so much money and time of the State's resources.

12. It could be said " if you don't like this country , rather than change our country to one you want move to a country that is closer to your liking. "

13. We should limit the number of bills politicians are allowed to make each session . To say 3 bills maybe that would help stop insane bills from

the list of bills each year. Also, go back to a session every other year. There has been no benefit to a session each year. Other than more taxes and more wasted money and time.

14. If the state wants to help stop crime. How about going back and enforcing good drug laws. Go after criminals and gangs jail violent criminals.

Remember there is no crime a gun can do it merely, criminals using a gun in a crime.
Like they do cars etc.
To repeat myself this is just big money dictators attempting total control .

respectfully

Ritch Hanneman and family
