

Submitter: Tyson Breuer

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3075

I'll have to say for my opinion that I opposed to this measure 114 and this new measure going into measure 114 to make gun laws stricter I'll have the same myself being a service member for the last 12 years that I will not name the organization that I am part of and to add for me hunting ever since I was the age of 12 years old that just because you put in stricter gun rules with the high capacity magazines to be disbanded and not allowed to have and for you to have a permit and a gun safety course to obtain a weapon or ammunition therefore, I will have to say this is retarded because you already have to go through a background check and everything else like that the problem is that people that voted for this now are opposing to this measure because they didn't read the fine line in the print so my thought process in my opinion is that this whole thing is very stupid and you do need a background check and everything before you are able to obtain a weapon, the main source to fire the ammunition so my thought on all this measure 114 and the other measure that goes along with measure 114 needs to be thrown out because it is against our second amendment to right to bear arms they are going against the federal constitution that we all stand up for and withhold
