

Submitter: David Keen

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3075

This is a complete overstep of government. You've heard it violated the constitution hundreds of times and extorts citizens to violate their duties to uphold that constitution. However, Americans have the legal right to forcefully oppose the constitution based on the second amendment that this disregards.

This places unnecessary financial burdens on our counties and cities and creates a burden for everyone associated with it. More paperwork, more workload on approving permits, extorts money from citizens, and punishes law abiding citizens. There is no necessary reason to put these laws into effect for any other reason that to push agendas.
