

Submitter: Garrett Rotter

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB3075

To whom it may concern,

As a law abiding resident, I strongly oppose this bill. I ask that we look at actual statistics and history of how stricter unconstitutional gun laws make states any safer. Criminals are going break laws and obtain gun either way the only people this hurts is law abiding hardworking people trying to protect themselves, families and community. This bill is a extremely irresponsible use of tax payers dollars for a multitude of reasons, for starters similar bills in other states have already been deemed unconstitutional by the Supreme Court so if this was to pass it would eventually end up in the Supreme Court wasting millions of dollars in legal fees and tying up assets. The police department that are already stretched very thin would have to allot more personal and money to implement this bill. I ask as a resident let's delegate these funds into proven methods such as more police budget and more community resources to make communities safer rather than unproven and unconstitutional methods. Thank you for the time and consideration.
